REASONS TO CHOOSE ROSNOU

BEST PRIVATE UNIVERSITY IN RUSSIA

Innovative approach to classical education

High level of Scientific activities

High demand for graduates

Tuition discounts for high-ranking students

Targeted training

International student exchanges

Employment assistance for graduates

Modern labs

Active student life

State-funded places

Student hostel

RosNOU employs

397 faculty members, including:

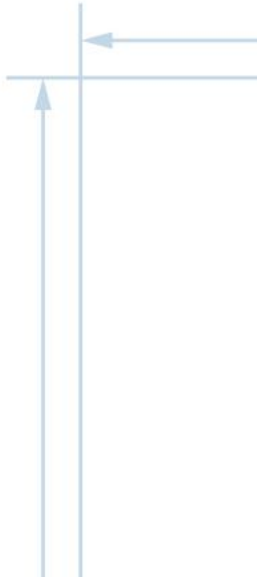

75 Doctors of Sciences

207 Candidates of Sciences

9 state prize holders

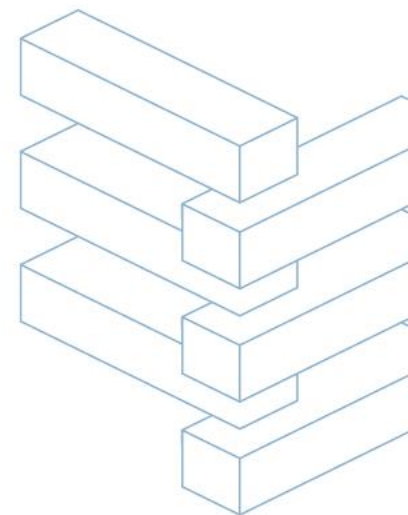

8 foreign professors

Moreover, the University cooperates with leading professors from Lomonosov Moscow State University (MSU), Moscow State Institute of International Relations (MGIMO), Moscow Institute of Physics and Technology (MIPT), and other Russian and foreign educational institutions.

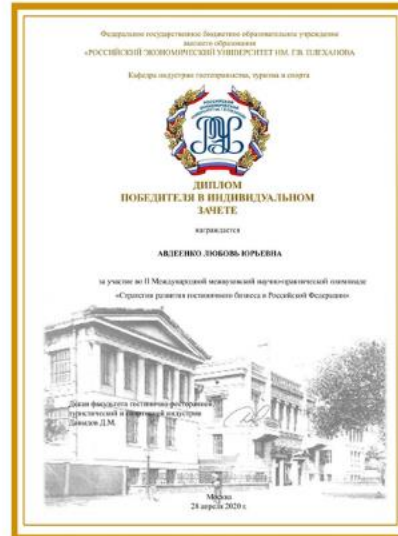

RosNOU students have reached the semifinal of the International Collegiate Programming Contest (ICPC)

Our students regularly win prizes in All-Russian academic competitions and contests

Science in RosNOU

Over a little more than a quarter of a century, RosNOU has become one of the largest universities in Russia that is primarily specialized in Social and Economic Sciences, Computer Science and Humanities. Moreover, it has become one of the national leaders of higher education. The University's unique feature is about the combination of education, research, development and consulting which are essential elements of large-scale projects on the development of society and scientific environment in Russia.

31 scientific schools

16 research projects

16 patents

9 educational laboratories
and scientific centers

16 scientific clubs

7 regularly held conferences
and seminars

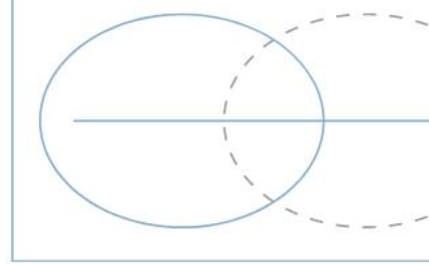

3 scientific journals

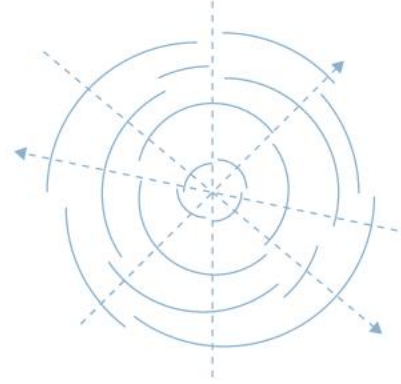

Laboratory of Carbon Nanomaterials

The Laboratory of Carbon Nanomaterials functions at the scientific and production enterprise “Center of Nanotechnologies” that was opened in 2008 with the assistance of the Russian New University. The purpose of the Center of Nanotechnologies is to implement innovative scientific developments on the creation of industrial technologies for the synthesis of carbon nanotubes as well as materials and devices based on them.

In 2014, the Center of Nanotechnologies received a quality certificate for DEALTOM carbon nanotubes, the technology of which was developed by RosNOU specialists.

Laboratory of Methods for Diagnostics of Nanoparticles, Composite Materials and Physicochemical Measurements

The laboratory comprises the following structural divisions:

- Laboratory of Crystallography;
- Laboratory of Materials Science;
- Laboratory of General Chemistry;
- Laboratory of Spectroscopy;
- Laboratory of Physical Chemistry.

The laboratories' up-to-date equipment allows conducting research of not only nanoparticles and their functional characteristics but also of macro-properties and structure of nano-modified materials.
